Document Control

- Company: NexusOne Technologies
- Document ID: software-access-control-policy-2026
- Owner department: it
- Permission profile: it_standard_access
- Confidentiality: public_internal
- Last updated: 2026-02-01
- Key topics: software access, GitHub, AWS, Jira, Slack, approval

Access Scope

- Allowed roles: employee, manager, hr, finance, it_admin, admin_ops, executive, ceo
- Allowed groups: all_employees, it_team
- Allowed users: none

Summary

Software access rules for Slack, Jira, GitHub, AWS, and other approved systems.

Standard Tools

- Slack, Jira, HRIS, Finance Portal, and Admin Portal are provisioned through SSO.
- GitHub and AWS need separate IT access tickets and approval.

Approval

- GitHub write access requires service owner or manager approval.
- AWS access requires environment, account, business reason, and duration.

Restricted Appendix

- Administrative and production access follows the privileged access process and is not granted through standard employee requests.

Data Generation Notice

- This is synthetic NexusOne Technologies data for local RAG, SQL, FAISS, and permission-filter testing.
- Do not replace this file with real company, employee, customer, vendor, financial, HR, security, or acquisition data.
