- Allowed groups: managers, hr_team, executive_team
- Allowed users: none

Summary

Manager hiring request workflow including headcount approval and backend engineer request details.

Request Inputs

- Hiring requests must include role title, department, manager, location, quarter, business reason, and budget code.
- Backfills require prior role reference. New roles require planned headcount or exceptional approval.

Backend Engineer Example

- A backend engineer request should include service ownership need, expected stack, GitHub access, AWS access, and interview panel.
- Engineering manager approval is required before HR and Finance review.

Approval Flow

- Managers submit requests in HRIS. HR validates job profile. Finance checks budget.

Executives review exceptional or strategic roles.

Data Generation Notice

- This is synthetic NexusOne Technologies data for local RAG, SQL, FAISS, and permission-filter testing.
- Do not replace this file with real company, employee, customer, vendor, financial, HR, security, or acquisition data.
